

Certificate

CO₂OP UG hereby confirms that

KMF GmbH Kunststoff-Metall-Formteile

has fully offset the corporate greenhouse gas footprint determined by us in accordance with the Greenhouse Gas Protocol Corporate Standard in the scope 1+2 balance sheet framework and one of a total of 15 categories from scope 3 for its gross emissions in 2024 by feeding in PV electricity from its own systems.

The company is therefore net carbon neutral for the year 2024¹

Aalen, den 10.07.2025

Prof. Dr. Frank Kramer, Gesellschafter CO₂OP UG (haftungsbeschränkt)

¹ The term "net carbon neutrality" means that the company in question did not cause any net greenhouse gas emissions into the atmosphere during the period under review. The company's measured GHG emissions were offset by emission savings of the same amount elsewhere by third parties and thus compensated for. The offset emissions could not have yet been avoided.
